DETAILED ACTION

1. The cancellation of claim 18 and the addition of claims 19-21 as set forth in the reply filed on 04/25/2007 are acknowledged.
2. Claims 1-17 and 19-21 are pending in the application.

Election/Restrictions

3. Applicant's election with traverse of claims 1-15 in the reply filed on 04/27/2007 is acknowledged. The traversal is on the ground(s) that "...the device and the method for making it, regardless of whether or not they should be considered separate inventions, are so closely related that the search and examination of the entire application can be made without serious burden...". This is not found persuasive because the inventions have acquired a separate status in the art because of their different classification and accordingly would require a different field of search.

The requirement is still deemed proper and is therefore made FINAL.

4. The application contains claims directed to the following patentably distinct species: the first species directed to a method of forming an electronic device including an insulating etch stop film that extends over the interconnection film according to Figs.1-11; the second species directed to a method of forming an electronic device wherein the interconnection film comprises a metal which itself provides the etch stop film according to Fig.12. The species are independent or distinct because the first species of the invention requires an insulating etch stop layer over the interconnection film and the second species uses the interconnection film as the etch stop film.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, none of the claims is generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).
